EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Jondle on February 11, 2004.

The application has been amended as follows:

Claim 31 (amended). A method of producing a soybean plant with modified fatty acid or carbohydrate metabolism comprising transforming the soybean plant of claim 2 with [one or more transgenes] a transgene encoding a protein selected from the group consisting of stearyl-ACP desaturase, fructosyltransferase, levansucrase, alphaamylase, invertase and starch branching enzyme.

Claim 33. (amended). A method of introducing a desired trait into soybean cultivar SG0911RR comprising:

(a) crossing the SG0911RR plants, grown from seed deposited under ATCC Accession No. PTA-_____, with plants of another soybean line that comprise a desired trait to produce F1 progeny plants, wherein the desired trait is selected from male sterility, herbicide resistance, insect resistance and resistance to bacterial, fungal or viral disease;

(b) selecting F1 progeny plants that have the desired trait to produce selected F1 progeny plants:

(c) crossing the selected F1 progeny plants with the SG0911RR plants to produce first backcross progeny plants;

(d) selecting for first backcross progeny plants that have the desired trait and physiological and morphological characteristics of soybean cultivar SG0911RR, as described in the Variety Description Information, to produce selected first backcross progeny plants; and

(e) repeating steps (c) and (d) three or more times in succession to produce selected fourth or higher backcross progeny plants that comprise the desired trait and all of the physiological and morphological characteristics of soybean cultivar SG0911RR as described in the Variety Description Information and as determined at a 5% significance level when grown in the same environmental conditions.

Claim 34 (amended). A plant produced by the method of claim 30, wherein the plant has the desired trait and all of the physiological and morphological characteristics of soybean cultivar SG0911RR as described in the Variety Description Information and as determined at a 5% significance level when grown in the same environmental conditions.

2. Claims 33 and 34 were amended for clarification as applicable under 35 USC 112, 2nd paragraph. Claim 31 was amended to avoid potential written description and enablement issues as applicable under 35 USC 112, 1st paragraph.

REQUIREMENT OF ALLOWANCE UNDER 37 CFR 1.801-1.809

3. The Deposit Statement in Applicant's amendment is deemed in accordance with 37 CFR 1.801-1.809. Since the application is otherwise in condition for allowance

Art Unit: 1638

except for the needed deposit of seed, and since the Office has received written assurance that an acceptable deposit will be made on or before payment of the issue fee, the Office is authorized to mail Applicant a Notice of Allowance and Issue Fee Due together with a requirement that the needed deposit be made within THREE (3) MONTHS of the mail date of this letter (see 37 CFR 1.809(c)).

As set forth in 37 CFR 1.809(c), Applicant is required to deposit 2500 seeds of the claimed plant within THREE (3) MONTHS of the mail date of this letter; thus the time for making the deposit is on or before the payment of the issue fee. Although the time period for paying the issue fee cannot be extended, the time period for satisfying the deposit requirement may be extended under the provisions of 37 CFR 1.136. Failure to make the needed deposit of 2500 seeds will result in abandonment of the application for failure to prosecute.

Applicant is reminded that once the deposit of seed has been made, information regarding the date of deposit, description of the deposited material including number of seeds deposited, name and address of the depository, and the accession number must be added to the specification in order to comply with 37 CFR 1.809(d). In addition, the claims must be amended to replace the blank "_____" with the appropriate Accession Number. Amendments to the specification and the claims must be filed under 37 CFR 1.312. If these amendments are received after payment of the issue fee, these amendments must be accompanied by a petition and fee, and a showing of good and sufficient reasons why these amendments were not presented earlier.

Art Unit: 1638
